Quality Assurance Engineer

Rev360 has an opening for a Quality Assurance Engineer for its cloud-based, electronic health record and practice management solution for eyecare. The QA Engineer plays an important part in our company's product development process. Our ideal candidate will be responsible for developing, publishing, implementing, and executing test plans prior to product releases, helping to ensure our software runs smoothly and meets user's needs.

THE COMPANY
Rev360 is a growth-stage software and business services company that is revolutionizing the eye care industry. We deliver products and services that offer doctors the freedom to focus on their patients.

Rev360's three business units serve more than 5,000 eye care providers across all 50 states and Canada.
- Software: RevolutionEHR, our software application, is the leading cloud-based electronic health record (EHR) and practice management software platform in eye care;
- Membership: The Professional Eye Care Associates of America (PECAA) is the nation's premiere doctor alliance group;
- Practice Partnership & Management Services: Visionary Partners is an innovative partnership between Rev360 and eye care practitioners to sustain and grow independent practices.

Visit us at https://www.rev-360.com to learn more.

THE POSITION
The Quality Assurance Engineer will:

- Participate in requirements and design reviews
- Collaborate with Product Managers and Engineers to stage and estimate work
- Plan tests to ensure product requirements are satisfied
- Install and configure test environments
- Run manual and automated tests
- Ensure complete and timely reporting of defects and test results
- Work with Engineers to ensure fixes are properly made to products
- Write internal documentation
- Assist with creation and maintenance of automated tests
- Work closely with a team of Engineers in an Agile setting
- Participate in Agile events (sprint planning, backlog grooming, and sprint retrospectives)

We seek candidates who thrive in a fast-paced, high-growth environment and can pivot quickly when needed. Candidates should have experience in most of the following areas:

- Prior healthcare experience (ideally working with Electronic Health Record systems)
- Experience with JIRA or similar issue tracking software
- Familiarity with Agile process for software development (e.g. Scrum)
- Prior use of automated testing tools (Selenium, GhostInspector, etc)

- Prior experience working in a remote environment
- Team Player
- Critical thinker and problem solver
- Good time-management skills
- Great interpersonal and communication skills
- Keen eye for detail and a commitment to excellence
- Able to review and analyze requirements, specifications, and design documents and provide timely feedback
- Ability to work independently
- Proficiency in MS Office applications; adept knowledge of application sharing tools and environments

THE LOCATION
We are a virtual company with most employees working from their home offices. Candidates must be based in the U.S.

WHY YOU SHOULD APPLY
Rev 360 believes that a company's greatest assets are its employees. To attract, inspire and retain top talent, Rev360's culture is based on these values:

Collaboration Wins • Grow Together • Know and Prioritize Thy Customer • Bring Energy
Root for Each Other • Think Big/Risk Smart • Push for Greatness • Move Mountains
Love Competition • Share Everything

Rev360 offers a comprehensive total rewards package including competitive compensation with base salary and bonus opportunity including; health and health reimbursement plans; dental, life and disability insurance plans; 401(k); and paid holiday and time off benefits. In addition, Rev360 offers "RevCares," a philanthropic program that enables employees to support non-profits and charities of their choice by providing a yearly monetary donation in their name.
