

revCONNECT patient engagement

RevConnect is a patient engagement app inside RevolutionEHR that streamlines your patient communication. Built for and enabled directly within RevolutionEHR, RevConnect simplifies the delivery and tracking of your patient reminders, recalls and custom messages via text and email. RevConnect increases office efficiency and enables patients to connect deeper with the practice leading to increased revenue and retention.

DEEPEN your patient RELATIONSHIPS

Set it and forget it.

Your patient messaging strategy is at your fingertips with automated text and email communication. Plus, real-time status of reminder, recalls and product notifications provides "same page" patient relationship awareness across your team.

INCREASE your REVENUE (and know it)

Lives inside RevolutionEHR.

Allows you to track the actual revenue associated with your recall and reminder efforts for a clear picture of ROI.

SIMPLE, EFFICIENT and INTUITIVE messaging

Never switch tabs again.

No need to switch back and forth between tabs, use two screens, or sync data with third party services. Your patient communication and messaging status is instantly up to date and accessible wherever you are – in or out of the office.

RevConnect has been a great addition to our practice! I made the change to RevConnect to increase efficiency, implement a secure method of communication with my patients, and to save money.

-Kelly Oas, Communications Coordinator
Isthmus Eye Care
